Doctor's note

Results reviewed on January 21, 2027. Blood sugar and cholesterol are a little higher than the reference range, and vitamin D is low. Kidney, thyroid, and blood counts are normal. Nothing here is urgent. Please book a routine appointment within the next 4 weeks so we can talk about these results together, including diet and activity, and whether any follow-up tests or treatment are needed. Please don't start any supplements or change any medicines before we meet.

Dr. Sarah Lindqvist, MD, Clintonville Family Practice
