Dustwise R5 Pet

Tangle-free robot vacuum for homes with pets

4.3 out of 5 (612 ratings)

US$249.00

In stock. Free delivery by Friday.

- Rubber tangle-free roller, made for pet hair
- Up to 110 minutes per charge
- Washable filter and bin
- App with schedules and room cleaning

About this item

The Dustwise R5 Pet uses a rubber roller instead of bristles, so long hair from dogs and cats doesn't wrap around it. 2,500 Pa of suction cleans hard floors and low-pile rugs. The bin and filter can be rinsed under the tap. Its camera navigation works best in rooms with some light.

Specifications

AI-generated review summary

Customers with pets say the Dustwise R5 Pet handles hair well without tangling. Some find it louder than other models and say the bin needs emptying often. A few report occasional app connection problems.

Reviews (most helpful first)

★★★★★ **Finally, no more cutting hair off the brush**

Maya L. | Reviewed December 18, 2026 | Verified purchase | Owned 7 months

Two shedding dogs and hard floors. The rubber roller never tangles. I empty the bin every day, but that's because of the dogs.

★★★★☆ **Loud but effective**

Greg H. | Reviewed January 2, 2027 | Verified purchase | Owned 9 months

It's louder than our old one, so we run it when we're out. Picks up everything on our hardwood and two rugs.

★★☆☆☆ **App keeps disconnecting**

Sonia V. | Reviewed December 27, 2026 | Verified purchase | Owned 4 months

Cleans well, but every couple of weeks the app loses connection and I have to restart the robot.

★★★★★ **Still going strong after a year**

Ben A. | Reviewed November 30, 2026 | Verified purchase | Owned 13 months

Bought it last year for our husky. No breakdowns, and the 2-year warranty gave me peace of mind.

★★★☆☆ **Small bin**

Ivy C. | Reviewed January 8, 2027 | Verified purchase | Owned 2 months

Good with hair, but the bin fills up fast in a big house. Fine for a smaller home.

★☆☆☆☆ **Gets lost in the dark**

Paul N. | Reviewed December 9, 2026 | Verified purchase | Owned 3 months

Camera navigation doesn't like our dark hallway. It gets stuck under the same chair.
