AI privacy checklist

Record what each assistant you use stores about you, and the settings you chose. Look in each assistant's Settings, usually under Data controls or Privacy, and in its privacy policy. Review this checklist twice a year, and after any major update.

1. The four questions

Question	Assistant 1	Assistant 2	Assistant 3
What's stored? Chats, files, voice, memories, connected accounts			
For how long? Until deleted? Kept for a period after that?			
Who can see it? You, staff in limited cases, shared links, employer			
Used for training? On by default? Is it on or off now?			

2. Settings I checked

Setting	Assistant 1	Assistant 2	Assistant 3
Training setting is the way I want it (note: on or off)	☐	☐	☐
Auto-delete or retention setting checked	☐	☐	☐
Memory list reviewed, and anything unwanted deleted	☐	☐	☐
Connected accounts reviewed, and unused ones removed	☐	☐	☐
Last ten chats checked for anything on the never-paste list	☐	☐	☐
Shared links I no longer need deleted	☐	☐	☐

3. Never paste these into an AI tool

- ✕ Passwords, PINs, and security codes, including one-time codes
- ✕ Financial account, card, and identity numbers
- ✕ Other people's private information without their permission
- ✕ Confidential work information not approved for that tool
- ✕ Health records and legal documents with identifying details
- ✕ Anything that would harm you if it became public

Date reviewed: _____ Next review (in six months): _____

Fill in on screen in any PDF app that supports forms, or print it. Settings and their names change, so check each company's own privacy page.
