Assistant scorecard

1. The test prompt

Send exactly the same prompt to each assistant. You can replace the text in square brackets, but use the same task for all of them.

```
I have one free Saturday to [paint my spare bedroom]. Write a plan for the day with
times, a shopping list, and three common mistakes to avoid. Keep it under 200 words.
```

My task, if I changed it: _____

2. Score each answer

Give each answer 1, 2, or 3 for each question: 1 = no or poorly, 2 = partly, 3 = yes or well.

Question	Assistant 1	Assistant 2	Assistant 3
Did it follow every instruction? Times, shopping list, three mistakes			
Is the advice accurate and sensible? Nothing wrong or unsafe			
Could you use it as it is? Without rewriting			
Is the tone right for you? Friendly, clear, not padded			
Did it stay under 200 words? Check with your word processor's count	☐ Yes ☐ No	☐ Yes ☐ No	☐ Yes ☐ No
Total score (out of 12)			

3. Notes

Anything that looked wrong, unsafe, or especially useful:

Assistant 1: _____

Assistant 2: _____

Assistant 3: _____

4. My choice

Use the flowchart in Figure 1.10B to choose. If two assistants scored the same, choose the one you found easier to use.

Destination assistant for most tasks: _____

Ambient assistant on my phone (if supported): _____

Why I chose them: _____

Fill in this scorecard on screen in any PDF app that supports forms, or print it. Use made-up or sample material when you test assistants, not private documents.
